

# Centre for Clouds and Climate Change Research

## Cotton University

### NOTICE

#### Announcement of Training Modules

The Centre for Clouds and Climate Change Research, Cotton University, in collaboration with NECTAR (North East Centre for Technology Application and Reach), is pleased to announce two training modules for students, researchers, and professionals:

**1. 10-Day Training Module on GIS and Remote Sensing**

- **Focus:** Fundamentals and applications of GIS and remote sensing for Geospatial Technology based Natural Resource and Environmental Management.

**2. 5-Day Training Module on Drone Applications – Data Acquisition and Processing**

- **Focus:** Techniques for using drones in acquiring and processing Drone images for geospatial applications with hands-on experience.

#### Details of the Program

- **Start Date:** 21st January 2025
- **Venue:** Cotton University Campus
- **Eligibility:** Open to students, and researchers having/pursuing UG & Masters
- **Registration:** Details will be shared soon via email and the university website.

#### Key Highlights

- Expert lectures by renowned scientists and practitioners.
- Practical sessions and field demonstrations.
- Certificates upon successful completion of the training.

#### For further information, contact:

Centre for Clouds and Climate Change Research, Cotton University

**Email:** c4rcug@cottonuniversity.ac.in

**Phone:** +91-8486282399 (Prolay Saha)

We encourage all interested participants to seize this opportunity to enhance their skills in geospatial technologies and applications.

**The training is completely free and sponsored by NECTAR and Cotton University in collaboration for benefit of Northeast Students**
