Learning Outcomes based Curriculum Framework (LOCF)

For BA PSYCHOLOGY PROGRAMME

Department of Psychology Panbazar, Guwahati- 781001, Assam, India **2022**

B. A. (HONS.) PSYCHOLOGY

Introduction

The LOCF for a B.A. / B.Sc. degree in psychology aims at offering a general framework within which psychology teaching may be organized. It serves twin goals of responding to the needs of students to grow as competent, self-reflective learners with relevant academic and professional skills and to prepare them as contributors to the growing discipline of psychology. This framework is intended to help maintaining the standards of teaching, its periodic review against graduate attributes, qualification descriptors, program learning outcomes and course level learning outcomes. Itshould be viewed in the spirit of innovation in teaching-learning process and should not be treated as an imposition of uniform syllabi, teaching-learning practices and the modalities of student assessment. They are adopted according to local conditions, pertinent regulations, regional priorities and availability of the expertise.

It must be noted that the landscape of undergraduate education in psychology is changing. Psychology's academic significance is on the rise and so are its contributions to human welfare. In fact psychology is now being introduced as an allied course in many disciplines and its teaching is considered highly relevant to address mental health concerns (e.g. depression, anxiety, stress, learning difficulties, suicide), social issues (e.g. prejudice and discrimination, violence, child abuse, media effects, problems of youth and elderly people), life style related health problems (e.g. CHD, hypertension, cancer, drug abuse and other kinds of addictions) and facilitating psychological health, personal growth and well being. Therefore, psychology graduates need to be equipped to appreciate and deal with these challenges. Indeed the scope of psychology teaching has widened and societal expectations from psychology graduates have gone up.

As a discipline psychology is characterized by huge variety in its scholarly content and approach. While psychology happens to be a social or behavioural science with noticeable advances in neuroscience, cognitive science, consciousness studies and studies of indigenous concepts, theories and practices, it is also a humanist and relational pursuit with strong implications for our social and cultural life. Psychology is both a human science and an art with a rich field of critical knowledge that endeavours to approximate the processes of lived life and socialreality.

PROGRAM SPECIFIC OUTCOMES (PSO)

PSO1: To enable students to acquire disciplinary knowledge and methods, use e-resources, enable data analysis, and to develop scientific writing skills.

PSO2: To facilitate in developing self awareness, self development, self-regulation skills and self-presentation skills

PSO3: Ability to relate and connect concepts with personal experiences and using critical thinking.

PSO4: To develop skills such as communication and effective interaction with others (including listening, speaking, and observational skills) and develop core positive attributes such as empathy, compassion, social

participation, and accountability.

PSO5: To enable students to developing cultural and historical sensibility particularly towards, sociocultural context of diverse (marginalized) groups.

PSO6: To develop a sense of commitment to health and wellbeing at different levels (e.g. individual, organization, community, society) including acknowledging the dignity and presence of others, awareness of social order, learning of values and social concern reflected through activation of social participates (e.g. village surveys, visiting old age homes and spending time with elderly, orphanage community service etc

COURSE LEARNING OUTCOMES

Three kinds of courses have been suggested – 1) Foundational 2) Elective, and 3) Skill Based.

Foundational Courses (FC): These courses have implications for several domains of psychology. Psychological literacy is incomplete without understanding these foundational courses. It is desired that the foundational courses are studied by all the psychology students.

Skill Based Courses (SBC): These courses focus on developing skills or proficiencies in the students, and are aimed at providing hands-on training. The skill based courses can be offered to both Psychology as well as non-Psychology students.

Elective Courses (EC): These courses offer choices and can be opted from a pool of courses. These are considered specialized or advanced to that particular course and provide extensive exposure in the area chosen. They are also considered more applied in nature.

Generic Elective (GE) Courses: As the name suggests, the scope of GE courses is very wide owing to the diversity of disciplinary backgrounds from which students opt GE courses in Psychology. Hence, University and College departments may design courses suitable to the kind of non-Psychology courses offered at their respective department/institution.
